

SI-75-S/D STRIP INSERTER

A high end solution for the production of "fold down assembly panels"

Developed for high quality production at high speed and precision

SI-75-S/D

- The strip inserter SI-75-S/D is the high end Avercon solution designed for production lines at high speed and precision.

- Designed to position strip material in motion from a roll into an opposite profile and to cut it on the right length.
- Continuous product flow with automatic reel change.

- Efficient and modular - compact and robust: Limited number of moving parts result in a reliable operation.
- Premium components as Siemens PLC, Sick sensors, Festo Pneumatics...

- Stand-alone machine with separate control unit.
- Installation and start-up by professionals.
- Easy service, easy maintenance.

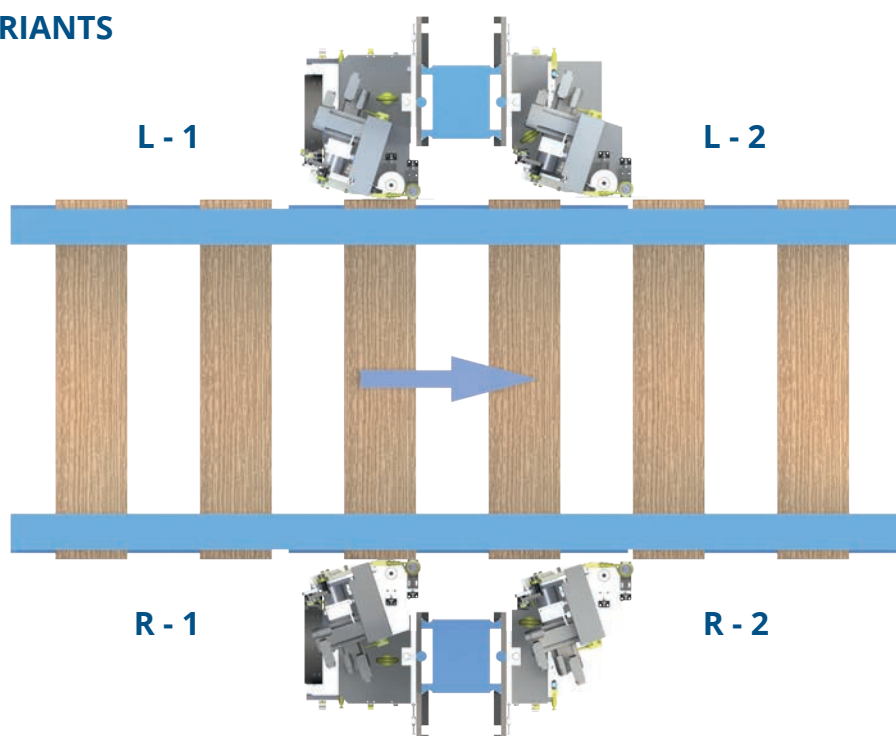

DATA SHEET

- Speeds up to 75 m/min
- Reel exchange without plank loss
- Unwinding unit included

OPTIONS:

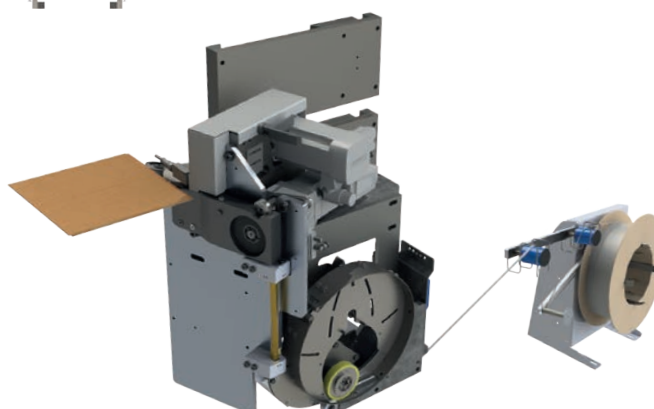

- X-Z carriage - build-on on customer Z-support
- Support for stand-alone mounting
- Installation set for strip type change
- Plank transport system for a complete integrated solution
- Custom design possible

MOUNTING VARIANTS

Also available: SI-25-S ECO

A low cost solution for production lines at lower speeds but with high quality standards. Speeds up to 25 m/min.
